PUBLIC BANK

Other customers have read this PDS and found it helpful, **you should read it too.**

Date : _____

KNOW YOUR PRODUCT

Product Name & Description	PB SHARELINK (“PBS”)		
	A product designed to facilitate your trading and investment in shares listed on Bursa Malaysia Securities Berhad (“BURSA”).		
Product Class & Description	SHARE MARGIN FACILITY (“SMF”)		
	<ul style="list-style-type: none"> SMF is a credit facility provided by Public Bank (“the Bank”) to you as an investor for the purpose of financing the purchase of shares listed on BURSA. It is a facility secured with shares, cash and/or fixed deposit pledged by you to the Bank. This allows you to leverage your existing assets to increase your purchasing power basing on the daily assigned Trading Limit and capitalize on emerging opportunities in the stock market. 		
Product Type & Description	Margin (“MA”)	External SMF (“E-SMF”)	Margin plus Trading (“MT”)
	Trading limit is assigned based on the margin multiplier of your collateral pledged. Trading activities are performed through Public Investment Bank Berhad (“PIVB”)	Trading limit is assigned based on the margin multiplier of your collateral pledged but the trading activities are performed through your appointed stockbroker/ investment bank.	Trading limit is assigned based on a combination of margin and trading multipliers of your collateral pledged. Trading activities are performed through PIVB.
Credit Limit	Minimum - RM50,000 Maximum – Subject to credit assessment		
Acceptable Collateral & Adopted Multiplier (See Note 1 of Schedule I for illustrations)	Margin Multiplier		Margin & Trading Multipliers
	Cash ¹ / FD ² : 2.5 times		Cash ¹ / FD ² : 2.5 + 1 = 3.5 times
	Shares ³ : 1.5 times		Shares ³ : 1.5 + 1 = 2.5 times
	¹ Credit balance in PBS Current Account. ² Fixed Deposit maintained with the Bank and pledged as collateral for the SMF facility. ³ Shares pledged as collateral for the SMF facility shall be subject to Bank’s assigned value.		
Pricing/ Prescribed Rate (% per annum)	Individual : SBR + 1.97% Company : BLR – 1.75%	Individual : SBR + 2.72% Company : BLR – 1%	Individual : SBR + 1.97% Company : BLR – 1.75%
	SBR = Standardised Base Rate. BLR = Base Lending Rate. Visit https://pbebank.com for latest SBR & BLR information. Interest is calculated on daily rest and capitalised monthly. The SBR is set as the Overnight Policy Rate (OPR) decided by Bank Negara Malaysia. The SBR can rise or fall due to changes in the OPR. The prescribed rate and interest amount charged to your account will be adjusted accordingly.		
Loan to Security Ratio (LSR)	$\frac{\text{Outstanding Balance} - \text{FD}}{\text{Bank's Value of Shares Pledged}} = 60\%$		
Margin Call	When LSR is $\geq 70\%$. You must cover the shortfall within 3 trading days from the date of Margin Call.		
Force-Selling	When LSR is $\geq 80\%$ or upon the expiry of the Margin Call, whichever earlier. Immediate force-selling of your shares will be instituted.		
Excess of Credit Limit	When the outstanding balance in your PB Sharelink Current Account exceeded the Approved Credit Limit. You must cover the shortfall within 3 trading days from the date of Excess of Credit Limit. Default interest rate of 1% will be charged on the amount in Excess of Credit Limit.		

The following accounts will be opened for you upon approval of your PB Sharelink – SMF application:

PBS Current Account	Trading Account	Central Depository System (“CDS”) Account
Account to be opened with the Bank. This account is used for funding and settling your Buy & Sell contracts and for subscribing to corporate action entitlements. KNOW YOUR RISKS & BENEFITS

RISKS

Your PB Sharelink SMF account and investment in shares may subject to the following key risks:

- Leverage Risk
- Market Risk
- Liquidity Risk
- Company Risk
- Regulatory Risk
- Inflation Risk

See Note 2 of Schedule I for definition of these risks

BENEFITS

- Attractive interest rate charged.
- Earn interest on credit balance in your PBS Current Account if you are an individual.
- Free access to online share trading platforms with real-time stock prices & information.
- Convenient and easy ways to deposit funds and auto-updating of account balance and trading limit upon deposit (excluding cheque deposit).
- Seamless support from the Bank's Share Investment Units ("SIUs") for all your investment and account needs.

OTHER KEY TERMS

- ✓ Opening a PB Sharelink account is subject to the Bank's approval. The operations of the account and trading of shares are governed by Malaysian laws and policies of the Bank, the appointed stockbroker/ investment bank, PIVB as well as regulatory authorities.
- ✓ Your PB Sharelink MA, E-SMF or MT account cannot be used for Initial Public Offering (IPO) application.
- ✓ Shares pledged and purchased are subject to the Bank's valuation/ capping and other controls e.g. Single Counter Exposure Limit ("SCEL") and Counter Spread Limit ("CSL"). If the SCEL and/or CSL is breached, your shares will be classified as "non-marginable" and no value will be assigned to these shares. Should your account hits margin call or force-selling due to the classification or due to the reduction in the Bank's assigned value of the shares, you are required to rectify the margin breach within the timeframe given.
- ✓ This document is a product disclosure sheet and is for informational purposes only. It is not an agreement or a substitute for the product's full terms and conditions.

SCHEDULE I

Note 1 : Illustrations on Computation of Trading Limit & LSR

	MA or E-SMF			MT		
	CB	FD	BSV	CB	FD	BSV
Approved Credit Limit ("ACL")	100,000			100,000		
Value (a)	10,000 CR	5,000	50,000	10,000 CR	5,000	50,000
Margin Multiplier (b)	2.5x (including CB value)	2.5x	1.5x	2.5x (including CB value)	2.5x	1.5x
Value x Margin Multiplier (c) = (a) x (b)	10,000 + 15,000 = 25,000	12,500	75,000	10,000 + 15,000 = 25,000	12,500	75,000
Cash/ Margin Balance (d)	(A)	25,000 + 12,500 + 75,000 = 112,500		(A)	25,000 + 12,500 + 75,000 = 112,500	
	(B)	ACL + CB = 100,000 + 10,000 = 110,000		(B)	ACL + CB = 100,000 + 10,000 = 110,000	
	Therefore, Cash / Margin Balance = (A) or (B), whichever is lower = 110,000			Therefore, Cash / Margin Balance = (A) or (B), whichever is lower = 110,000		
LSR computation	$\frac{[(\text{Outstanding Balance} - \text{FD}) / \text{BSV}] \times 100}{100}$ $= \frac{[(110,000 - 10,000 - 5,000) / 50,000 + 110,000] \times 100}{100}$ $= \frac{[95,000 / 160,000] \times 100}{100}$ $= 59.38\%$					
Assumption:						
<ul style="list-style-type: none"> • Entire Cash/ Margin Balance of RM110,000 is utilised to purchase shares. • The Bank's value of the shares purchased is RM1.00 per share, thus, RM110,000 is to be added as BSV. 						
Trading Multiplier (e)	-	-	-	1x	1x	1x
Value x Trading Multiplier (f) = (a) x (e)	-	-	-	10,000	5,000	50,000
Trading Balance (g)	-			65,000 (#)		
Total Available Balance (h) = (d) + (g)	110,000			175,000		
Notes						
CB	Actual balance in the PB Sharelink Current Account after factoring in the pending trade settlement amount for Buy and/or Sell contract(s) which is inclusive of transaction cost charged by BURSA and contract stamp duty.					
FD	Total value of Fixed Deposit Receipt(s) pledged as collateral to secure the SMF.					
BSV	Bank's assigned value on the shares in your share portfolio.					
#	Customer to deposit to settle the contracts purchased under "Trading Balance" on settlement date – T+2 day.					

Note 2 : Definition of Risks

Leverage Risk	This is the risk from you investing using borrowed money. This includes potential inability to pay back the loan or interest, as well as the risk of having to add more cash or securities to your account if your investments lose value and trigger a margin call or force-sell. Leverage risk doesn't exist in a vacuum; it's often a magnified result of other risks such as Market Risk, Liquidity Risk, Company Risk and Regulatory Risk.
Market Risk	This is the risk that your investments will lose value due to overall market movements. A market downturn can significantly decrease the value of your leveraged investments, quickly leading to a margin call. With leverage, a small market correction can have a disproportionately large impact on your portfolio's value.
Liquidity Risk	This is the risk that you won't be able to sell your investments quickly enough without taking a significant loss. If you get a margin call during a period of low market liquidity, it can be hard to sell assets to raise cash. This makes you more vulnerable to forced selling by the financier, as you can't satisfy the margin call on your own terms.
Company Risk	This is the risk that a specific company's stock will decline due to factors unique to that company, such as poor earnings, management issues, or a product failure. If you've heavily leveraged your position in a single company, and it underperforms, this risk is significantly amplified and can quickly lead to a margin call and force-selling.
Regulatory Risk	This refers to the risk of changes in laws or regulations that could impact your investments. For example, a change in margin requirements could increase the maintenance margin, making it easier for you to receive a margin call, even if your portfolio's value hasn't changed. This adds another layer of unpredictability to leveraged investing.
Inflation Risk	Lower customer spending and high interest rate charged on company's borrowing could result in decline in profit that could adversely affect the company's share price.
